WHY CHOOSE SOLTECH?

RELIABILITY

On-time execution with consistent service quality across every project size and segment.

QUALITY ASSURANCE

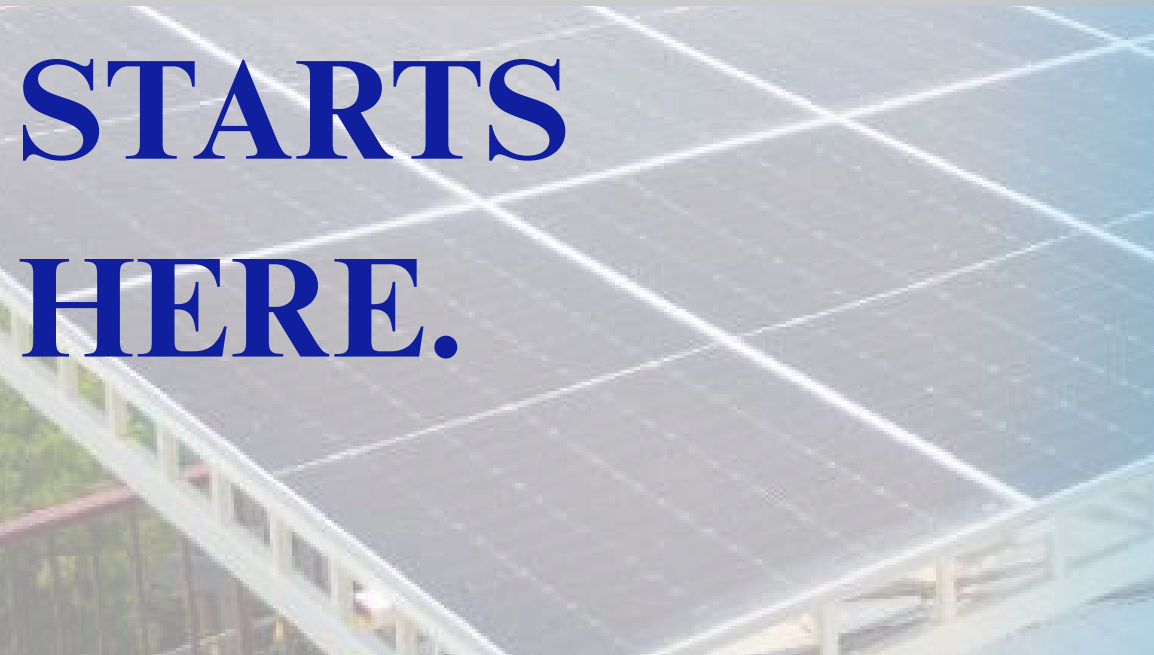

High-performance systems designed for durability and long-term savings, not the lowest upfront cost.

END TO END

System design, installation and ongoing support handled by a single accountable team.

YOUR JOURNEY TO SMARTER ENERGY STARTS HERE.

WHY SWITCH TO SOLAR?

Save over 90% on your electricity bills every month.

Let's take a simple example.

If your electricity bill is around ₹3,000 a month, you're spending about ₹36,000 every year.

And as electricity prices keep increasing, your total bills can add up to around ₹13–14 lakh over 25 years.

A 3 kW solar system can meet the needs of a home with this level of consumption. With the applicable government subsidy, the cost of going solar becomes much more affordable.

So, why keep paying for electricity year after year when your rooftop can generate it for you?

Your electricity bill is an expense. Your rooftop can become an asset.

Find Your Ideal Solar System

ESTIMATED UNITS NEEDED	RECOMMENDED SOLAR CAPACITY
1,400 ⚡	1 kW (1,400/1,400 Units)
2,800 ⚡ ⚡	2 kW (2,800/1,400 Units)
4,200 ⚡ ⚡	3 kW (4,200/1,400 Units)
5,600 ⚡ ⚡ ⚡	4 kW (5,600/1,400 Units)
7,000 ⚡ ⚡ ⚡	5 kW (7,000/1,400 Units)
14,000 ⚡ ⚡ ⚡ ⚡	10 kW (14,000/1,400 Units)

Solar Capacity Guide by Appliance Usage

Appliances type	3 kW	5 kW	10 kW
 Air conditioner	No	2	3-4
 Fridge	1	1	1
 Geyser	1	2	2-3
 Washing machine	1	1	1
 TV	1	1	2
 Pump	No	No	1
 LED bulb	3-4	3-4	6-7
 Tube light	1-2	1-2	3-4
 Fan	4-5	4-5	6-7

Key Factors to Consider -:

- Shadow-Free Rooftop Space
- Sanctioned Load
- Solar Panel Orientation & Tilt
- Rooftop Suitability

Your Solar *Journey*, From Start to Support

01 CONSULTATION

Understand your requirements, goals and property before any design begins.

03 SUPPORT

Continue supporting system performance through assistance and maintenance.

05 NET METERING

Support all documentation, utility approvals and grid-connection processes.

02 SITE ASSESSMENT

Evaluate rooftop suitability, sunlight hours, shadow analysis, electrical requirements and area.

04 SYSTEM DESIGN

Develop the solar solution around the property's requirements.

06 INSTALLATION

Professional installation with strict attention to structural integrity and safety standards.

Everything You Should Know Before Going Solar.

DO SOLAR PANELS WORK DURING MONSOON AND CLOUDY WEATHER?

YES. Solar systems generate electricity in all seasons, including monsoon and cloudy days.

DO I NEED A BATTERY WITH ROOFTOP SOLAR?

NOT NECESSARILY. Grid-connected systems work well for most homes. Add batteries if you need backup or want to maximize self-consumption.

ARE SOLAR PANELS MAINTENANCE-FREE?

MOSTLY. Minimal maintenance is needed—cleaning 2–4 times a year. We provide annual maintenance support with every installation.

DOES EVERY HOME NEED THE SAME SOLAR SYSTEM SIZE?

NO. System size depends on your electricity usage, rooftop area, and sunlight availability. We design systems around your actual needs.

SHOULD I CHOOSE THE CHEAPEST QUOTATION?

NOT ALWAYS. Look beyond price—focus on quality, reliability, warranties and after-sales support for long-term savings and peace of mind.

SOLAR SUBSIDY, SIMPLIFIED.

Let the government support your investment.

How the Subsidy Reduces Your Cost

Total System Cost

₹2,10,000
(for 3 kW)

Government
Subsidy

₹78,000

Your Effective
Investment

₹1,32,000
(After Subsidy)

HOW IT WORKS

- **CHECK
ELIGIBILITY**
- **INSTALL
SOLAR**
- **CLAIM
SUBSIDY**

 Solar System Capacity	 Average Cost Before Subsidy*	 Government Subsidy	 Average Cost After Subsidy
2 kW	₹1,85,000	₹60,000	₹1,25,000
3 kW	₹2,10,000	₹78,000	₹1,32,000
4 kW	₹2,70,000	₹78,000	₹1,92,000
5 kW	₹3,25,000	₹78,000	₹2,47,000
10 kW	₹5,80,000	₹78,000	₹5,02,000

This table helps you compare the estimated cost before subsidy with the approximate amount payable after subsidy.

*Please note:
Actual costs may vary depending on the solar panels and inverter selected, mounting structure, installation requirements, net-metering charges and the after-sales service package chosen.*

SOLAR: A SMARTER LONG-TERM INVESTMENT

A ₹2.1 lakh investment can work very differently depending on where you put it. Here's how solar compares.

YOUR ROOFTOP. YOUR ENERGY. YOUR FUTURE.
